## Hospital's General Consent vs. SNN Informed Consent

Hospital's General Consent	SNN Informed Consent	Data transfer
if <b>unencrypted transfer</b> of personal data to third parties allowed	Parents signed "yes"	Date of birth, patient number
If <b>ONLY encrypted transfer</b> of personal data to third parties allowed <b>&gt;&gt; MNDS use SNN Informed Consent</b> <b>&gt;&gt; B34: ok</b>	Parents received, not returned	Patient number
If <b>NO transfer</b> of personal data to third parties allowed <b>&gt;&gt; pls. use SNN Informed Consent</b>	Parents signed "no"	Anonymized

**MNDS requires date of birth** for Follow-up data linkage and matching of transfer data.

**B34 requires patient number** as only primary hospital enters data until discharge home.

## Data submission

MNDS: Level III units submit data from birth to discharge home. Level IIB units submit inborn data only as well as outborn data of infants born in Level IIA etc.
